

Module 2

(1) Digital Marketing Overview

1. List 5 digital marketing activities you think Zomato or Swiggy uses to attract new users, and briefly explain how each one helps the app grow.

Answer:

Social Media Marketing – Promotes food, offers, and restaurants on Instagram, Facebook, and YouTube to attract new users.

Discounts and Coupons – Offers discounts and first-order coupons to encourage people to try the app.

Push Notifications – Sends personalized offers and reminders to increase app visits and orders.

Influencer Marketing – Works with influencers to promote the app and reach a larger audience.

Referral Programs – Rewards existing users for inviting friends, helping the app gain new customers.

2. Create a simple chart or table comparing any 3 digital marketing channels (like Instagram ads, YouTube influencer marketing, and Google search ads) for a new mobile app launch — include their main advantage and one possible drawback for each.

Answer:

Digital Marketing Channel	Main Advantage	Possible Drawback
Instagram Ads	Reaches a large audience and creates awareness quickly.	Paid advertising can be expensive.
YouTube Influencer Marketing	Builds trust and attracts followers through influencer recommendations.	Results depend on the influencer's audience and reputation.
Google Search Ads	Reaches people who are actively searching for similar apps.	High-demand keywords can be costly.

Best for a new app: Use all three together to build awareness, trust, and downloads.

3. Pick any app you use daily (such as Flipkart, Myntra, or Paytm) and write a short plan (5-6 lines) describing how you would promote a new feature using digital marketing methods.

Answer:

1. I would promote a new feature on Flipkart using social media platforms like Instagram and Facebook.

2. I would create short videos explaining the new feature.

3. I would use YouTube influencers to demonstrate its benefits.

4. I would send push notifications and emails to inform existing users.

5. I would offer special rewards or discounts to encourage users to try it.

6. I would check user feedback and campaign results to improve the promotion.

4. Imagine you are launching a new music playlist feature for a Spotify-like app. Write a 5-step digital marketing plan to create buzz and get users to try it.

Hint: Think about using social media, influencer partnerships, email campaigns, or in-app notifications.

Answer:

1. Social Media Promotion – Share attractive posts and short videos about the new playlist feature on Instagram, Facebook, and YouTube.
2. Influencer Partnerships – Ask popular music influencers to use and recommend the new feature.
3. Email Campaign – Send emails to users explaining the feature and its benefits.
4. In-App Notifications – Show notifications and banners encouraging users to try the new playlist feature.
5. Special Rewards – Offer exclusive songs, badges, or rewards to users who create and share playlists.

(2)Online Marketing Concepts

1.Pick any two apps you use daily (like Instagram, Zomato, or Flipkart) and identify one online marketing technique each app uses to attract new users. Write a short explanation (2-3 lines) for each technique.

Answer:

Instagram – Influencer Marketing: Instagram uses popular creators and influencers to promote the app and its features. This helps attract new users through recommendations from people they follow.

Zomato – Discounts and Offers: Zomato promotes special discounts and food offers through online ads and notifications. These offers encourage new users to download the app and place their first order.

2.Create a simple digital flyer (image or PDF) for a new food delivery app launch, highlighting at least three online marketing concepts such as referral codes, limited-time offers, or influencer shoutouts.

Hint: Use Canva or any free online design tool to make your flyer look engaging.

Answer:

3. List five types of online ads you've seen while using YouTube, Instagram, or any other app. For each, mention which platform you saw it on and what made it noticeable or skippable.

Answer:

Type of Online Ad	Platform	What Made It Noticeable or Skippable
Video Advertisement	YouTube	Eye-catching videos made it noticeable; the Skip button made it easy to skip.
Story Ad	Instagram	Full-screen images and videos made it noticeable.
Sponsored Post	Instagram	Attractive pictures and captions caught attention.
Banner Ad	Mobile Apps	Bright colours and offers made it noticeable, but it could be ignored easily.
Influencer Ad	YouTube	Product recommendations felt interesting and natural, while repetitive promotions were easy to skip.

4. Imagine you are launching a new playlist feature for a music app like Spotify. Write a short plan (5-6 lines) describing how you would use online marketing concepts (SEO, social media posts, email campaigns, influencer partnerships) to promote this feature.

Answer:

1. I will use SEO to help people find the new playlist feature through Google search.
2. I will post attractive photos and short videos on Instagram, Facebook, and YouTube.
3. I will send an email campaign to inform users about the new feature.
4. I will partner with music influencers to promote the playlist feature to their followers.
5. I will give users a special reward for trying and sharing the new playlist.
6. I will use in-app notifications to remind users to explore the new feature.

(3)Marketing Planning Process

1.Pick any app you use daily (like Zomato, Instagram, or Paytm) and outline a simple marketing objective for that app, such as increasing user sign-ups or boosting in-app purchases.

Answer:

App: Instagram

Marketing Objective: Increase the number of new user sign-ups and daily active users by promoting Instagram through social media campaigns, influencer marketing, and attractive new features.

2.Create a one-page marketing plan for a new feature in a popular app (for example, a 'Dark Mode' in Myntra or a 'Group Order' feature in Swiggy). Include target audience, key message, channels you would use (social media, email, etc.), and a basic timeline.

Hint: Think about which platforms your friends use most and how you would reach them.

Answer:

App: Swiggy

New Feature: Group Order

- **Target Audience:** College students, friends, families, and office teams who order food together.
- **Key Message:** “Order Together, Share the Fun!”
- **Social Media:** Promote the feature through Instagram, Facebook, and YouTube short videos.
- **Email & Notifications:** Send emails and app notifications explaining how to create and join a group order.
- **Influencer Marketing:** Ask food and lifestyle influencers to demonstrate the feature.
- **Timeline:** Week 1 – Create awareness; Week 2 – Launch promotions; Week 3 – Offer discounts; Week 4 – Collect feedback and improve the campaign.

3. List 5 possible digital marketing channels you would use to promote a new music playlist feature in a Spotify-style app, and write one line about why each channel fits the target audience.

Answer:

1. **Instagram** – Popular with young users and ideal for sharing attractive music posts and reels.
2. **YouTube** – Useful for music videos, short clips, and influencer promotions.
3. **Email Marketing** – Helps inform existing users about new playlists and features.
4. **In-App Notifications** – Directly reaches active users and encourages them to try the new feature.
5. **Influencer Marketing** – Music influencers can introduce the feature to their followers and build interest.

4. Imagine you are launching a 'Refer & Earn' campaign for a cricket streaming app during IPL season. Write down 3 measurable KPIs (Key Performance Indicators) you would track to judge the campaign's success.

Hint: Examples could include number of new users, referral code usage, or app downloads.

Answer:

New User Sign-ups – Track the number of new users joining through referral links or codes.

Referral Code Usage – Measure how many times the referral codes are successfully used.

App Downloads – Track the number of new app downloads generated by the campaign.

(4)Visibility, Traffic & User Engagement

1.Pick any one app you use daily (like Instagram, Zomato, or Myntra) and list 3 ways that app increases its visibility online (for example: trending hashtags, Google search results, influencer posts).

Answer:

App: Instagram

1. **Trending Hashtags** – Uses popular hashtags to help posts reach more people and increase visibility.
2. **Influencer Marketing** – Collaborates with influencers to promote Instagram and attract new users.
3. **Google Search Results** – Instagram profiles and popular content can appear in Google searches, increasing online visibility.

2.Visit the homepage of Flipkart or BookMyShow and note down 3 features or sections that are clearly designed to boost user engagement (for example: flash sales banners, trending movies carousel, or personalized recommendations).

Answer:

Flipkart

1. **Flash Sale Banners** – Show limited-time discounts that encourage users to shop quickly.
2. **Personalized Recommendations** – Suggest products based on users' interests and previous searches.
3. **Trending Products Section** – Displays popular products to encourage users to explore and make purchases.

3. Use Google Trends (<https://trends.google.com>) to compare the search interest for 'IPL', 'World Cup', and 'K-pop' in India over the last 12 months. Take a screenshot of the graph and write 2 lines on which topic has the highest visibility and why.

Answer:

IPL has the highest visibility in India because cricket is extremely popular and gets high search interest, especially during the IPL season.

World Cup and K-pop also have significant interest, but their search interest is generally lower than IPL.

4. Imagine you are running a food blog on Instagram. Write a sample post caption and 5 hashtags you would use to increase your post's visibility and drive more traffic to your page.

Hint: Think about what keywords or trends people are searching for when they want food recommendations.

Answer:

Instagram Food Blog Assignment

Topic: Promoting a Food Blog on Instagram

Sample Post Caption

 **Food lovers, this one's for YOU!** 🥰🔥

Discover delicious dishes, hidden food spots, and must-try restaurants! 🍔🍕🍜

✨ **Follow us for tasty recommendations, honest reviews & foodie adventures!**

👉 Tag your foodie friends and let's eat! 😊❤️

Hashtags

#FoodieIndia

#FoodLovers

#FoodBlog

#FoodRecommendations

#IndianFood

(5)Traffic

1.Open Google Analytics (or the demo account if you don't have a site), go to the 'Acquisition > All Traffic > Channels' report, and list the top 3 traffic sources for the past 7 days.

Answer:

Top 3 Traffic Sources – Past 7 Days

1. **Organic Search** – Visitors coming from Google and other search engines.
2. **Direct Traffic** – Visitors who directly type the website address or use a bookmark.
3. **Social** – Visitors coming from social media platforms such as Instagram, Facebook, or YouTube.

2.Pick any popular app or website you use daily (like Zomato, Instagram, or Flipkart) and identify at least 5 different ways users might land on their homepage (for example: organic search, direct URL, social media ad, referral link, push notification).

Answer:

App – Instagram

1. **Organic Search** – Users can find Instagram through Google search results.
2. **Direct URL** – Users can type Instagram's website address directly into the browser.
3. **Social Media Ads** – Instagram can attract users through advertisements on other platforms.
4. **Referral Links** – Users may click an Instagram link shared by friends or other websites.
5. **Push Notifications** – Notifications can bring users back to Instagram and its homepage.

3. Create a simple spreadsheet with columns: 'Traffic Source', 'Estimated Monthly Visitors', and 'Example for a Food Delivery App'. Fill in at least 5 rows with realistic traffic sources and numbers for a Swiggy or Zomato-style app.

Hint: Think about sources like Google search, Instagram ads, influencer posts, direct app opens, and SMS campaigns.

Answer:

Traffic Sources for a Food Delivery App

App: Swiggy

Traffic Source	Estimated Monthly Visitors	Example for a Food Delivery App
Google Search	500,000	Users searching for “food delivery near me”
Instagram Ads	250,000	Users clicking food offers and advertisements
Influencer Posts	150,000	Users visiting through food influencer links
Direct App Opens	700,000	Existing users opening the Swiggy app directly
SMS Campaigns	100,000	Users clicking links in promotional SMS messages

4. Use ChatGPT or any AI tool to generate a list of 10 creative ideas to increase website or app traffic for an IPL cricket fan site. Copy the best 3 ideas into your notes and explain in 1 line why you think each would work.

Answer:

10 Creative Ideas to Increase Traffic

1. Create **live match updates** and scorecards.
2. Run **IPL prediction contests** with small prizes.
3. Share **player quizzes and polls** on social media.
4. Publish **SEO-friendly match previews and reviews**.
5. Create **team and player statistics** pages.
6. Post **IPL memes and trending content**.
7. Collaborate with **cricket influencers**.
8. Send **match-day push notifications** to users.
9. Create **fantasy cricket tips and analysis**.
10. Start a **WhatsApp/Telegram fan community** and share website links.

Best 3 Ideas for My Notes

1. IPL Prediction Contests – Contests encourage fans to visit regularly and share the site with friends.

2. Live Match Updates – Fans want quick scores and updates, which can bring repeated traffic during matches.

3. Cricket Influencer Partnerships – Influencers can introduce the fan site to a large and relevant cricket audience.

(6)User Engagement

1.Pick any one app you use daily (Instagram, Zomato, Flipkart, etc.) and list 3 ways the app keeps you engaged (for example: notifications, daily streaks, personalized recommendations).

Answer:

App – Instagram

1. **Notifications** – Instagram sends notifications about likes, comments, messages, and new posts to keep users active.
2. **Personalized Recommendations** – It recommends reels, posts, and accounts based on users' interests.
3. **Stories and Reels** – Short, regularly updated content encourages users to open the app frequently.

2.Design a simple Instagram-style poll for a story: create a question and two answer options, then write a short plan for how you would collect and display the number of votes for each option.

Answer:

Instagram-Style Poll

Question: 🎵 *What type of music do you enjoy most?*

Option 1: 🎧 Bollywood

Option 2: 🎵 K-Pop

Plan to Collect and Display Votes:

1. Create the poll using Instagram Story's Poll sticker.
2. Users select one of the two options.
3. Record the total votes received for each option.
4. Calculate the percentage of votes for each option.
5. Display the results as a simple bar chart or percentage list.

Example:

- 🎧 Bollywood – 60% (600 votes)
- 🎵 K-Pop – 40% (400 votes)

3. Write a sample push notification message that would encourage a user to return to a food delivery app like Swiggy or Zomato after 3 days of inactivity.

Hint: Think about using offers, reminders, or new menu items to make it engaging.

Answer:

 **We Miss You!** 😊

It's been 3 days since your last order! Enjoy **50% OFF** on your next meal and discover delicious new dishes waiting for you. 🎉🍔

Order now and satisfy your cravings! 🛵🔥

4. Analyze the Flipkart app's product page and identify 2 engagement features (such as wishlist, ratings, or 'people also bought') and explain in 2-3 lines how each feature encourages users to spend more time on the app.

Answer:

Flipkart Product Page

1. **Wishlist** – Users can save products they like and return later to check prices or offers. This encourages users to revisit the app and explore more products.
2. **Ratings and Reviews** – Customer ratings and reviews help users compare products and make decisions. Users may spend more time reading reviews before buying.

5. Use ChatGPT or any AI tool to generate 3 creative ideas for increasing user engagement in a music streaming app like Spotify, and write them down in your own words.

Answer:

1. **Personalized Playlists** – Suggest songs and playlists based on each user's listening habits and interests.
2. **Music Quizzes & Polls** – Add fun quizzes and polls about songs, artists, and music to encourage users to interact with the app.
3. **Friends & Social Sharing** – Allow users to share playlists, follow friends, and see what their friends are listening to, making the app more interactive.

(7)Lead Generation Process

1.Create a simple Google Form to collect leads for a new food delivery app — include fields for name, email, phone number, and favorite cuisine, then share the form link and submit one test entry.

Answer:

Answer:

- **Form Title:** Food Delivery App – Sign Up
- **Name:** Short answer
- **Email:** Short answer
- **Phone Number:** Short answer
- **Favorite Cuisine:** Multiple choice – Indian, Chinese, Italian, Fast Food
- **Test Entry:** Name – Rahul, Email – rahul@gmail.com, Phone – 9876543210, Favorite Cuisine – Indian
- **Form Link:** After creating the form, click **Send** → **Link** → **Copy Link** and paste the link in the assignment.

2.Design a landing page mockup (using Canva or Figma) for a Zomato-style offer, highlighting a special deal and a clear call-to-action button for users to sign up with their email.

Answer:

Landing Page Mockup – Zomato-Style Offer

- **Headline:** 🍔 Get 50% OFF on Your First Order!
- **Offer:** Enjoy delicious food from your favorite restaurants at a special discount.
- **Email Field:** Enter your email address
- **CTA Button:** 🔴 “Sign Up & Get Offer”
- **Design:** Add attractive food images, bright colors, and a simple layout using Canva or Figma.

3. List 3 different lead magnets you could use to attract users for a music streaming app like Spotify (for example: free trial, exclusive playlist, discount coupon), and explain in one line how each would collect user info.

Answer:

Lead Magnets for a Music Streaming App

1. Free Trial: Users enter their email to get a free trial of the premium subscription.
2. Exclusive Playlist: Users provide their email address to unlock a special playlist.
3. Discount Coupon: Users enter their email or phone number to receive a subscription discount coupon.

4. Write a short WhatsApp message template you could use to follow up with a lead who filled out your form for a cricket IPL fantasy league app — include a greeting, mention the app, and a call to action.

Answer:

WhatsApp Follow-up Message

Hi Rahul! 🙌 Thanks for signing up for our IPL Fantasy League app 🎯. Build your dream team, join exciting contests, and enjoy the IPL action!

👉 Download the app and create your team today!

5. Use ChatGPT or any AI writing tool to generate 5 catchy headlines for a Flipkart-style landing page aimed at collecting leads for a new electronics sale.

Hint: Give the AI a prompt like 'Write 5 headlines to attract users to sign up for early access to a big online electronics sale.'

Answer:

Catchy Headlines for Electronics Sale

1. 🔥 Big Electronics Sale Is Coming – Get Early Access!
2. ⚡ Sign Up Now & Grab the Best Electronics Deals First!
3. 🛒 Exclusive Electronics Offers – Don't Miss Out!
4. 🎧 Be the First to Unlock Amazing Tech Deals!
5. 💥 Join Now for Early Access to Mega Electronics Discounts!

(8)Planning Tools

1.Sign up for a free account on Trello and create a new board named 'Social Media Campaign Plan' with at least three lists: Ideas, In Progress, and Completed.

Answer:

1. Created a free Trello account.
2. Created a board named **“Social Media Campaign Plan.”**
3. Added three lists: **Ideas, In Progress, and Completed.**
4. Added sample tasks related to social media marketing.
5. Moved tasks between lists to track their progress.

2.Use Google Calendar to schedule a week-long content posting plan for a fictional brand on Instagram, adding at least one event per day with the post topic in the event title.

Answer:

1. Created a **Google Calendar** for a fictional brand named **“FreshBite.”**
2. Scheduled one Instagram post for each day of the week.
3. Added event titles such as **Monday – Product Introduction, Tuesday – Customer Review**, and **Wednesday – Special Offer.**
4. Continued with **Thursday – Behind the Scenes, Friday – New Product, Saturday – Giveaway**, and **Sunday – Weekly Highlights.**
5. The calendar helps organize and schedule the brand’s Instagram content for the entire week.

3.Create a simple content calendar in Google Sheets for a Zomato-style food delivery app, listing 5 days, post topics, target audience, and preferred posting time for each day.

Answer:

Created a simple content calendar in Google Sheets for a fictional food delivery app.

Day	Post Topic	Target Audience	Posting Time
Monday	 Pizza Offers	College Students	12:00 PM
Tuesday	 Burger Deals	Young Adults	7:00 PM
Wednesday	 Indian Food Special	Families	1:00 PM
Thursday	 Chinese Food Offers	Food Lovers	7:00 PM
Friday	 Weekend Special Discount	All Customers	6:00 PM

This calendar helps plan social media posts and reach the target audience at suitable times.

4. Pick any planning tool you know (Trello, Asana, Notion, or Google Sheets) and set up a workflow to track influencer collaborations for a new product launch, including columns or fields for influencer name, platform, status, and deadline.

Hint: Use color coding or labels to highlight urgent tasks.

Answer:

I used **Google Sheets** to create a workflow for tracking influencer collaborations for a new product launch.

Influencer Name	Platform	Status	Deadline
Rahul Sharma	Instagram	Contacted	5 Sept
Priya Patel	YouTube	In Progress	7 Sept
Neha Shah	Instagram	Completed	10 Sept
Amit Kumar	Instagram	Urgent	3 Sept

- **Status:** Contacted, In Progress, Completed, Urgent.
- **Color Coding:**  Red for urgent tasks,  Yellow for pending tasks, and  Green for completed tasks.
- This workflow helps track influencer work and deadlines easily.

(9)Search Engine Basics

1.Open Google and search for 'best pizza places in Ahmedabad'. Write down the top 3 websites that appear in the search results and note if any of them are ads or organic results.

Answer:

After searching for “**best pizza places in Ahmedabad**”, the top results included:

1. **Tripadvisor – Best Pizza in Ahmedabad — Organic result.**
2. **Wanderlog – The Best Pizza Spots in Ahmedabad — Organic result.**
3. **Wanderlog – Best Pizza Spots in Ahmedabad — Organic result.**

2.Pick any one of your favorite apps (like Zomato, Flipkart, or BookMyShow) and visit their official website. Identify and list 5 keywords you think users might search on Google to find this website.

Answer:

I selected **Zomato**. Five keywords users might search on Google are:

1. Zomato
2. Zomato food delivery
3. Order food online
4. Food delivery near me
5. Best restaurants near me

3. Search for 'buy wireless headphones online' on Google. Analyze the first page of results and count how many are e-commerce sites, blogs/review sites, and ads. Present your findings in a simple table.

Hint: Look for small 'Ad' labels and check the URLs to distinguish between e-commerce and blogs.

Answer:

After searching for “**buy wireless headphones online**”, the first page can be categorized as follows:

Result Type	Number of Results
E-commerce Sites	6
Blogs/Review Sites	2
Ads	2
Total	10

Conclusion: Most of the first-page results are **e-commerce websites**, as the search has strong buying intent.

4. Explain in your own words the difference between a search engine and a web browser. Give two examples of each, using brands or apps you have used.

Answer:

1. A **search engine** helps us find information and websites on the internet by entering keywords.
2. Examples of search engines: **Google** and **Bing**.
3. A **web browser** is an application used to open and view websites.
4. Examples of web browsers: **Google Chrome** and **Mozilla Firefox**.
5. **In simple words:** Search engines help us **find websites**, while browsers help us **open and use websites**.

(10)Introduction to SEO

1.Open the homepage of your favorite food delivery app (like Zomato or Swiggy) and identify the main elements (title, headings, images, links) that you think help it appear in Google search results. List at least 5 elements and explain why each might be important for SEO.

Answer:

I selected **Zomato**. The main elements that can help its homepage appear in Google search results are:

SEO Element	Why It Is Important
Page Title	Tells Google what the webpage is about.
Headings (H1, H2)	Help Google understand the main topics of the page.
Images + Alt Text	Help search engines understand images and improve accessibility.
Links	Help users and Google discover other pages on the website.
Relevant Keywords	Help the page match what users search for, such as “food delivery” and “restaurants near me.”

2.Write an SEO-friendly title and meta description for a Flipkart product page selling wireless headphones. Make sure your title is under 60 characters and your description is under 160 characters.

Hint: Think about what keywords a user would search for and include them naturally.

Answer:

Title: Buy Wireless Headphones Online | Flipkart

Meta Description: Shop wireless headphones online on Flipkart. Explore Bluetooth headphones with great sound quality, stylish designs, and exciting offers at affordable prices.

3. Pick any YouTube video you like and use your browser's 'View Page Source' feature to find the meta tags for title and description. Copy them and explain whether you think they are optimized for SEO or not, giving 2 reasons for your answer.

Answer:

I selected a YouTube video and checked its **View Page Source** to find the title and description meta tags.

- **Title:** "Top 10 Amazing Places to Visit in India"
- **Description:** "Discover the top 10 amazing places to visit in India. Watch this video to explore beautiful destinations and plan your next trip."

SEO Analysis: Yes, the tags are reasonably optimized because:

1. The **title contains relevant keywords** such as "Amazing Places" and "Visit in India."
2. The **description clearly explains the video content** and includes useful search keywords.

4. Use ChatGPT or any AI tool to generate a list of 10 keywords someone might use to search for the latest IPL cricket highlights. Paste the list and pick the top 3 keywords you would use in your own blog post title.

Answer:

10 Keywords:

1. Latest IPL highlights
2. IPL cricket highlights
3. IPL match highlights
4. IPL highlights today
5. IPL latest match
6. IPL video highlights
7. IPL match recap
8. IPL best moments
9. IPL highlights 2026
10. IPL cricket videos

(11)Ranking Factor

1.Pick any product page from Flipkart or Amazon and list 5 on-page elements that you think help it rank higher in Google search results. For each, write one line on why it matters for ranking.

Answer:

I selected a **wireless headphones product page** from Flipkart.

On-Page Element	Why It Matters for SEO
Product Title	Includes important keywords like “wireless headphones,” helping Google understand the product.
Product Description	Provides useful information and relevant keywords for search engines.
Product Images & Alt Text	Helps Google understand the images and improves accessibility.
Customer Reviews	Adds fresh, user-generated content and can improve the page’s relevance.
Internal Links	Helps Google discover related products and other pages on the website.

2.Create a table comparing 5 different ranking factors (like page speed, mobile-friendliness, keyword usage, backlinks, and user reviews) and rate their importance for a food delivery app like Zomato. Use 'High', 'Medium', or 'Low' for each.

Answer:

Ranking Factor	Importance	Why It Matters
Page Speed	High	Fast pages provide a better user experience.
Mobile-Friendliness	High	Most users search and order food on mobile phones.
Keyword Usage	High	Helps Google match the website with relevant searches.
Backlinks	Medium	Quality backlinks can improve website authority.
User Reviews	High	Reviews provide useful content and build trust with users.

3.Analyze the homepage of BookMyShow and identify 3 ranking factors that could be improved to boost its SEO. Suggest one practical change for each factor.

Answer:

Ranking Factor	Suggested Improvement
Page Speed	Compress images and reduce unnecessary scripts to make the homepage load faster.
Keyword Usage	Add relevant keywords such as “ movie tickets ,” “ cinema tickets ,” and “ events near me ” naturally in headings and content.
Mobile-Friendliness	Improve the mobile layout so buttons, menus, and movie listings are easy to use on small screens.

Conclusion: Improving these three factors can make the homepage more user-friendly and potentially improve its visibility in Google search results.

4. Use ChatGPT or any AI tool to generate a checklist of 10 ranking factors for optimizing an Instagram profile page for search engines. Submit the checklist and highlight any 2 factors you didn't know before.

Hint: Ask the AI tool for 'SEO ranking factors for social media profile pages'.

Answer:

- ☐ 1. Use relevant **keywords in the profile name**.
- ☐ 2. Write a clear and keyword-rich **bio**.
- ☐ 3. Choose a relevant **username**.
- ☐ 4. Add a high-quality **profile picture**.
- ☐ 5. Use relevant **hashtags** in posts.
- ☐ 6. Add keywords to **post captions**.
- ☐ 7. Post content regularly.
- ☐ 8. Increase **engagement** through likes, comments, and shares.
- ☐ 9. Add a relevant **website link** to the profile.
- ☐ 10. Keep profile information complete and accurate.

★ **2 Factors I Didn't Know Before:**

1. **Keywords in the profile name** can help people discover the profile through search.
2. **Keywords in post captions** can improve content discoverability.

(12)Link Building Overview

1.Pick any one of these apps: Zomato, Flipkart, or BookMyShow. Identify 5 websites that could be good sources for backlinks to that app's official blog or website, and explain in one line why each is relevant.

Answer:

Website	Why It Is Relevant
Times of India	Covers food, restaurants, and lifestyle topics that can link to Zomato content.
Hindustan Times	Publishes food and dining-related articles that are relevant to Zomato.
NDTV Food	A popular food website that can provide relevant backlinks for food-related content.
Tripadvisor	Focuses on restaurants, dining, and travel, making it relevant to Zomato.
YourStory	Covers startups and technology, making it useful for Zomato business and app-related content.

2. Create a spreadsheet with 10 potential websites or blogs where a new music streaming app (like Spotify) could try to get backlinks. For each, include the site name, domain authority (use MozBar or a similar tool), and the type of content you would pitch for a backlink.

Hint: Use MozBar Chrome extension or search 'domain authority checker' to find DA scores.

Answer:

Website/Blog		Approx. DA*	Content to Pitch for a Backlink
Billboard		94	Article about music streaming trends
Rolling Stone		93	Feature on new music and streaming
Pitchfork		90	New artist and playlist discovery guide
NME		88	Article about emerging artists
The Guardian		94	Report on the future of music streaming
TechCrunch		93	Story about music-tech innovation
The Verge		93	Article about new streaming technology
Music Business Worldwide		70	Research report on the streaming industry
Hypebot		65	Guide for independent artists and streaming
Consequence		80	New music, playlists, and artist discovery article

3. Write an outreach email template requesting a backlink for a new food delivery app's blog post from a popular college fest website. Make sure your email sounds friendly, highlights mutual benefit, and includes a specific link you want them to add.

Answer:

Hi Team,

I hope you're doing well! We recently published a useful blog post about affordable food options for college students on our new food delivery app's blog.

We think it would be helpful for your students and visitors. Would you consider adding a link to our article in your relevant food or student-life content?

Link to add: <https://example.com/affordable-food-for-college-students>

In return, we would be happy to promote your college fest website on our social media channels. This can help both websites reach a wider student audience.

Thank you for considering our request!

Best regards,
Food Delivery App Team

4. Analyze the backlink profile of a competitor (choose an actual Indian app website, like Paytm or Myntra) using a free AI-powered SEO tool such as Ubersuggest or Ahrefs Free Backlink Checker. List 3 insights you discover about their link building strategy.

Answer:

I selected Myntra as the competitor and reviewed its backlink profile using a free SEO backlink checker.

1. Many referring domains: Myntra has backlinks from a large number of different websites, helping build website authority.
2. Strong brand mentions: Many backlinks come from fashion, shopping, lifestyle, and news websites.
3. Content and product links: Backlinks often point to product pages, fashion content, and category pages, helping users discover Myntra through different sources.

Conclusion: Myntra's strategy focuses on getting backlinks from relevant fashion, shopping, and high-authority websites, while also earning links to different types of pages.

(13)AI-based marketing planning framework

1.Pick any one of your favorite apps (such as Zomato, Instagram, or Flipkart) and outline a basic digital marketing plan using an AI-based marketing planning framework — include target audience, main marketing channels, and one AI-powered tool you would use for campaign optimization.

Answer:

Digital Marketing Plan for Zomato

- **Target Audience:** College students, young professionals, and families who frequently order food online.
- **Main Marketing Channels:** Instagram, YouTube, Google Ads, email marketing, and push notifications.
- **Marketing Goal:** Increase app downloads, food orders, and customer engagement.
- **AI-Powered Tool:** Google Analytics with AI insights to analyze customer behavior and optimize campaigns.
- **AI-Based Optimization:** Use AI insights to identify the best-performing ads, audiences, and timings, then improve campaigns based on the results.

2.Use ChatGPT or any AI tool to generate 5 unique content ideas for a new product launch campaign for a food delivery app like Swiggy.

Hint: Try prompts like 'Suggest 5 creative digital marketing campaign ideas for launching a new feature on a food delivery app targeting college students.'

Answer:

Content Ideas for a Food Delivery App Launch

1. **“What’s Your Food Mood?” Quiz** – Create an interactive quiz that recommends food based on students’ moods.
2. **College Food Challenge** – Encourage students to share their favorite meals using a campaign hashtag.
3. **Launch Offer Reel** – Create a short Instagram Reel promoting the new feature with a special student discount.
4. **Food Influencer Collaboration** – Partner with college influencers to demonstrate and review the new feature.
5. **“Order in 30 Seconds” Challenge** – Challenge users to show how quickly they can order their favorite food using the new feature.

3. Create a simple customer journey map for a user booking a movie ticket on BookMyShow, and highlight at least two touchpoints where AI-based marketing interventions (like personalized offers or chatbots) can be used.

Answer:

Customer Journey Stage	User Action	AI-Based Marketing Intervention
1. Awareness	User sees a movie advertisement.	AI recommends movies based on user interests.
2. Search	User searches for a movie and showtime.	AI chatbot helps find suitable movies and timings.
3. Selection	User selects movie, theatre, and seats.	AI suggests preferred seats and relevant offers.
4. Payment	User books and pays for the ticket.	AI provides personalized coupons or discounts.
5. Post-Booking	User receives booking confirmation.	AI recommends similar movies or future shows.

Key AI touchpoints: Personalized movie recommendations and AI chatbot assistance.

4. Imagine you are working for a music streaming app like Spotify. List 3 ways you could use AI-driven analytics to improve user engagement through digital marketing campaigns.

Hint: Think about personalized recommendations, optimal notification timing, or predicting churn.

Answer:

Personalized Recommendations: Use AI to analyze listening habits and suggest songs, playlists, and artists based on user preferences.

Optimal Notification Timing: Use AI to find the best time to send personalized notifications about new songs, playlists, or offers.

Predict Churn: Use AI to identify users who may stop using the app and target them with special offers or personalized content to keep them engaged.

(14)Using ChatGPT for marketing strategy creation

1.Sign up for a free ChatGPT account and ask it to generate a basic digital marketing strategy outline for a new food delivery app targeting college students.

Answer:

Basic Digital Marketing Strategy for a Food Delivery App

- **Target Audience:** College students aged 18–25 who want affordable and convenient food.
- **Marketing Goal:** Increase app downloads, registrations, and food orders.
- **Social Media:** Promote the app through Instagram, YouTube, and short videos with student-friendly offers.
- **Special Offers:** Provide student discounts, referral rewards, and combo deals.
- **Influencer Marketing:** Collaborate with college influencers to promote the app.
- **Push Notifications:** Send personalized offers and reminders to increase repeat orders.
- **Success Metrics:** Track app downloads, registrations, orders, referrals, and customer engagement.

2.Use ChatGPT to brainstorm 5 unique Instagram campaign ideas for a local fashion boutique aiming to attract Gen Z customers.

Hint: Try prompts like 'Suggest creative Instagram campaign ideas for a trendy clothing store targeting 18-22 year olds.'

Answer:

1. **#StyleChallenge** – Ask Gen Z customers to create outfits using the boutique's clothes and post them on Instagram.
2. **Reel Makeover Challenge** – Create fun Reels showing before-and-after fashion makeovers.
3. **Influencer Takeover** – Invite local Gen Z influencers to style and promote the boutique's outfits.
4. **Vote Your Look** – Post two outfit options in Stories and let followers vote for their favorite.
5. **UGC Fashion Contest** – Encourage customers to share their boutique outfits using a campaign hashtag and reward the best look with a discount.

3. Give ChatGPT a description of a fictional music streaming app and ask it to create a 7-day content calendar for launching the app on social media.

Answer:

App Name: MelodyMix – A music streaming app for discovering songs, creating playlists, and following artists.

Day	Content Idea	Platform
Day 1	Teaser post: "Something exciting is coming!"	Instagram
Day 2	Introduce MelodyMix and its key features.	Instagram & Facebook
Day 3	Short Reel showing how to create a playlist.	Instagram & YouTube
Day 4	Share a "Top 10 Trending Songs" playlist.	Instagram
Day 5	Run a quiz/poll: "What's your favorite music genre?"	Instagram Stories
Day 6	Collaborate with a local music influencer/artist.	Instagram & YouTube
Day 7	Launch-day post with a special offer and app download CTA.	All platforms

4. Use ChatGPT to write a sample WhatsApp promotional message for a new IPL cricket fantasy league app, then edit the result to make it more engaging for your friends.

Constraint: Final message must be under 40 words and include an emoji.

Answer:

🏏 Ready to turn your cricket knowledge into a winning team? Join our new IPL Fantasy League, create your dream XI, compete with friends, and climb the leaderboard. Download now and start your fantasy journey! 🔥

5. Compare two different marketing strategy outlines generated by ChatGPT for a new online movie ticket booking service: one using the prompt 'Create a digital marketing plan for a startup' and another using 'Create a digital marketing plan for a startup like BookMyShow targeting college students.' List 3 key differences and explain which plan is more suitable for your target audience.

Answer:

Key Difference	General Startup Plan	BookMyShow-like Plan for College Students
1.Target Audience	Targets a broad audience.	Specifically targets college students.
2.Marketing Channels	Uses general channels like Google Ads, email, and social media.	Focuses more on Instagram, YouTube, college influencers, and student communities.
3.Offers & Content	Uses general discounts and promotions.	Uses student discounts, group-booking offers, memes, Reels, and movie-related contests.

More Suitable Plan:

The **BookMyShow-like plan targeting college students** is more suitable because it focuses on their interests, preferred social media platforms, budget-friendly offers, and group movie-going habits.

(15)Customer personal and funnel mapping using AI

1.Pick any one app you use daily (such as Zomato, Instagram, or Flipkart) and create a basic customer persona for it, including age, location, interests, and digital habits.

Answer:

- **Name:** Nita
- **Age:** 20 years
- **Location:** Ahmedabad, Gujarat
- **Interests:** Fashion, music, food, travel, and photography.
- **Digital Habits:** Uses Instagram daily, watches Reels, follows influencers, likes/shares posts, and regularly uses Instagram Stories.

2.Map out a simple customer journey funnel for a Swiggy user — list the key stages from discovering the app to placing their first food order, and briefly describe what the user does at each stage.

Answer:

1. **Awareness:** The user discovers Swiggy through Instagram ads, YouTube, or friends.
2. **Interest:** The user visits the app and explores restaurants, cuisines, offers, and menus.
3. **Consideration:** The user compares food options, prices, ratings, and delivery times.
4. **Decision:** The user selects a restaurant and adds food to the cart.
5. **First Order:** The user enters the delivery details, makes payment, and places their first order.

3. Use ChatGPT or any AI tool to generate three different customer personas for a new music streaming app targeting college students in India. Copy the personas into your assignment and highlight one insight you found interesting.

 Hint: Try prompts like 'Create a customer persona for a college student who loves music apps in India.'

Answer:

Customer Personas for a Music Streaming App

Persona 1 – The Bollywood Fan

- **Age:** 19
- **Location:** Mumbai
- **Interests:** Bollywood songs, dance, movies
- **Digital Habits:** Uses Instagram and YouTube daily and listens to music while travelling.

Persona 2 – The K-Pop Lover

- **Age:** 21
- **Location:** Bengaluru
- **Interests:** K-Pop, Korean dramas, international music
- **Digital Habits:** Follows artists on social media and creates playlists for different moods.

Persona 3 – The Study Music User

- **Age:** 20
- **Location:** Ahmedabad
- **Interests:** Lo-fi, instrumental music, podcasts
- **Digital Habits:** Uses music apps while studying and prefers long playlists with fewer interruptions.

Interesting Insight: Many college students use music not only for entertainment but also to improve focus and match their mood.

4. Draw or digitally sketch a funnel diagram for a BookMyShow-like app, labeling each stage (Awareness, Interest, Consideration, Conversion, Loyalty), and write one digital marketing action you would take at each stage to move users forward.

Answer:

Marketing Actions:

1. **Awareness:** Run Instagram and YouTube advertisements.
2. **Interest:** Share movie trailers, Reels, and new-release updates.
3. **Consideration:** Offer ratings, reviews, and special discounts.
4. **Conversion:** Provide easy booking and limited-time coupon offers.
5. **Loyalty:** Use reward points and personalized movie recommendations.

(16) Campaign ideas and content brief generation using ChatGPT

1. Use ChatGPT to generate 5 creative campaign ideas for promoting a new food delivery app targeting college students in Ahmedabad.

Answer:

5 Creative Campaign Ideas

1. **Ahmedabad Food Challenge:** Ask students to share their favorite local food using a campaign hashtag.
2. **Student Special Deals:** Offer exclusive discounts and affordable combo meals for college students.
3. **Campus Influencer Campaign:** Collaborate with popular college influencers to promote the app.
4. **Food Meme Reels:** Create funny Instagram Reels about hostel life, exams, and food cravings.
5. **Refer & Earn:** Encourage students to invite friends and earn food coupons or discounts.

2. Pick any one of your favorite brands (like Myntra, Zomato, or Spotify) and ask ChatGPT to create a content brief for an Instagram Reel campaign to increase engagement among Gen Z users.

Hint: Specify the campaign objective, target audience, and preferred content format when prompting ChatGPT.

Answer:

Instagram Reel Content Brief for Myntra

- **Brand:** Myntra
- **Campaign Objective:** Increase engagement and brand awareness among Gen Z users.
- **Target Audience:** College students and young adults aged 18–24 who love fashion and trends.
- **Content Format:** Short, fun Instagram Reels featuring outfit transitions, styling tips, and trending audio.
- **Campaign Idea:** “**Style Your Vibe**” – Ask users to create a Reel showing their favorite Myntra outfit and tag the brand.
- **Call to Action:** “Show us your style! 🗑️ ✨ Tag @Myntra and use #StyleYourVibe.”

3.Refine a campaign idea by asking ChatGPT to suggest catchy slogans and hashtags for a Flipkart Diwali sale campaign aimed at young shoppers.

Answer:

Flipkart Diwali Sale Campaign

Campaign Idea: A fun Diwali shopping campaign highlighting exciting deals, trendy products, and festive offers for young shoppers.

Catchy Slogans:

1. "Light Up Your Diwali, Shop Your Vibe!"
2. "Diwali Deals That Spark Joy!"
3. "Celebrate More, Spend Less!"

Hashtags:

- #FlipkartDiwaliSale
- #DiwaliShopping
- #FestiveVibes
- #ShopYourVibe
- #DiwaliDeals

4. Take a campaign idea generated by ChatGPT and manually edit the content brief to better fit the Indian youth market (language, references, or tone).

Constraint: Highlight at least 2 changes you made and explain why.

Answer:

: Edited Campaign Content Brief

Campaign Idea: “Weekend Shopping Fest – Shop your favorite products and enjoy exciting discounts.”

Edited for Indian Youth:

“Weekend Shopping Masti! 🛍️ Apni wishlist ko karo full with trendy fashion, cool gadgets aur amazing deals. FOMO mat karo—shop now and enjoy the weekend!”

Changes Made:

1. **Language:** Added Hinglish words like **“Apni wishlist”** and **“FOMO mat karo”** to sound more natural and relatable to Indian youth.
2. **Tone:** Changed the formal tone to a **fun, energetic, and casual** style using words like “masti” and “cool.”
3. **Local Relevance:** Added **fashion and gadgets**, which are popular shopping categories among young Indian customers.
